

Manual
HDD initializing

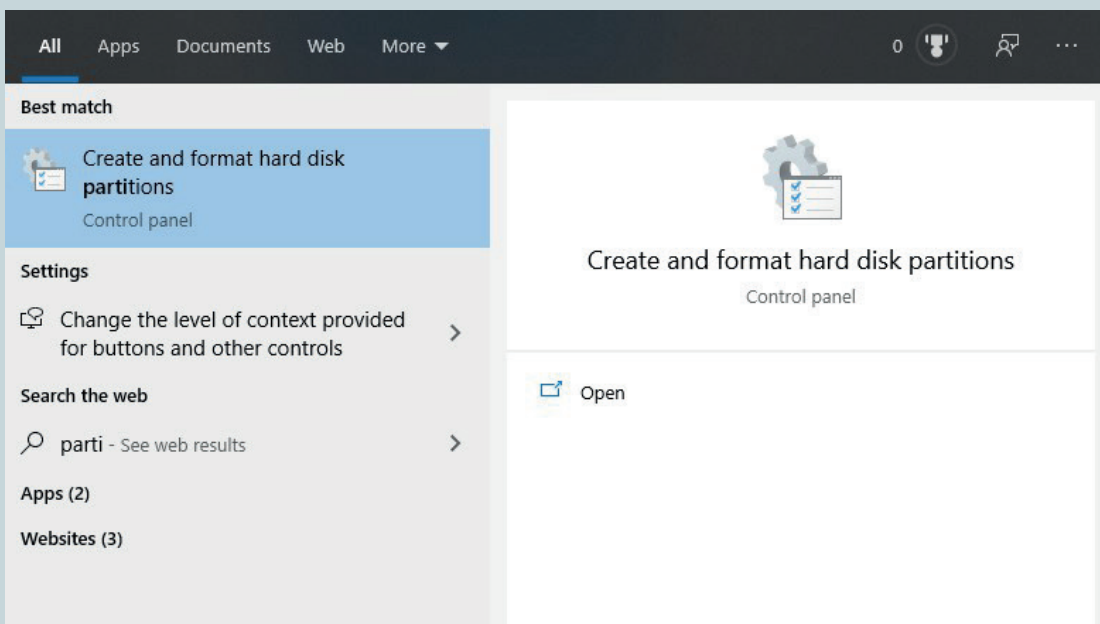

“The best choice in memory & data storage solutions”

How to initialize your Hard Drive Disk:

- Click with your left mouse button on the windows search bar:

- then type "parti" and click the highlighted button:

- In this program you see your hard drive with a red circle and an arrow down. This states that the drive is not initialized.

Right click on the square that states your disk:

- Click initialize disk.

- After the previous steps it should look like this:

- The disk is now recognized by Windows.

That is all there is to it!
